

Service Area-10 Water and Wastewater Treatment Plant Tour Prudhoe Bay, Alaska

North Slope Borough Mayor Charlotte Brower and Alaska Governor Bill Walker joined us for a tour of the SA-10 Water and Wastewater Treatment Plant in Prudhoe Bay, Alaska.

According to Mike Monnin of the North Slope Borough, "Mayor Brower, Gov Walker and the entourage were very, very impressed with the design and function of the facility. They were especially impressed to discover the slab they were standing on was poured less than 12 months ago. All were pleased to hear of the increased capacities, the re-use of effluent and long term service the NSB will offer the oil field."

The SA-10 Water and Wastewater Treatment Plant project sits adjacent to the Owner's existing and fully-operational water and wastewater treatment plant. Estimated completion of this project is in the fall of 2015.-
